

FOR IMMEDIATE RELEASE

Security MicroImaging Appointed to Integrate Enterprise Content Management Solution for Oconomowoc Residential Programs

Milwaukee, WI October 25, 2006 – Security MicroImaging has been awarded a significant contract to develop and integrate an Enterprise Content Management (ECM) solution for Oconomowoc Residential Programs (ORP). By implementing a company-wide ECM solution to manage ORP's Human Resources and Legal documents, ORP will achieve increased efficiency of records retrieval and enhanced service while significantly reducing the physical space required for records storage.

As a leading provider of Enterprise Content Management, Security MicroImaging has chosen to implement Hyland Software's OnBase. Numerous software modules, including those involving scanning, records management, Outlook integration, and application enabler technologies, are being integrated to specifically address ORP's current and future business objectives.

ORP provides residential and community based services for people with developmental and other disabilities. ORP's dedicated team of 1800+ professionals provides caring services to over 1,000 individuals at over 100 unique locations throughout Wisconsin and Indiana. For over 30 years, they have provided quality and cost effective service options for individuals, and proudly serve as a nationally recognized leader in specialized residential treatment care.

Security MicroImaging looks forward to developing and maintaining a successful, long-term business relationship with ORP to help them achieve their operational and service objectives.

About Security MicroImaging

Security MicroImaging provides vision, development, and implementation of a full spectrum of innovative, results-driven content management processes and tools to enterprises striving for optimal business performance. Security MicroImaging serves as a respected source for capturing, managing, distributing, archiving, and securing information; providing enterprise content management software and hardware; and supplying back office support for document and data conversion services in both digital and analog formats. Recognized for consistent growth and integrity since its inception in 1969, Security MicroImaging is dedicated to establishing and maintaining productive relationships with clients to ensure their individualized objectives are realized with regard to content management.
